- UX/UI Design Bootcamp  
Re:Coded
- UX/UI Certificate of Expertise  
Mindset Institute
- Responsive Web Design  
freeCodeCamp

## About Me

My transition into UX/UI design stems from the intersection of my drive to help others and my skills. I found that UX/UI design allows me to create meaningful solutions that directly impact people's experiences with digital products. To refine my expertise, I completed intensive programs like Mindset Institute's UX/UI Design Expertise and Re:Coded's selective UX/UI Bootcamp, where I focused on user-centered design and hands-on application.

Currently, I work as a UX/UI Designer at an international company, where I contribute to global projects, creating designs that resonate with diverse user needs. I am deeply passionate about crafting intuitive and impactful experiences that bridge the gap between user needs and business goals. My commitment to continuous learning and growth fuels my drive to excel in this dynamic and ever-evolving field.

## Experience

- 09/2023 - Currently  
**UX/UI Designer**  
Techtile Software Company

At Techtile Software Company, I specialize in creating user-centric, innovative, and impactful designs. I have contributed to various projects by delivering visually appealing and highly functional interfaces that enhance user experiences. By effectively managing research, prototyping, and testing phases, I have developed solutions that balance both user needs and business objectives.

## Education

- 04/2023 - 08/2023  
**UX/UI Design**  
Re:Coded

I successfully completed a rigorous 4.5-month Re:Coded Immersive bootcamp, accepting only 5% of applicants.

- 01/2023 - 06/2023  
**UX/UI Design**  
Mindset Institute

I completed a focused certificate program, gaining skills to craft impactful digital experiences.

- 09/2018 - 07/2022  
**B.A. International Logistics Management**  
Yasar University

Transitioning from international logistics to UI/UX design showcases my adeptness in merging diverse disciplines.

## PROJECTS • *newest to latest*

- **ParkinsonKey**

ParkinsonKey is an assistive app created to support individuals with Parkinson's disease, featuring an enlarged keyboard and customizable shortcuts to aid in communication. I focused on user-centered design for accessibility, ensuring that key sizes and layout options accommodate motor skill challenges.

- **MindSwell - Growth Journal**

MindSwell is an affirmation and gratitude journal app that includes customizable templates, multimedia integration, daily challenges, and AI-driven insights to support users' mental well-being. I led the design of the app's layout and interface, focusing on accessibility and engagement through unique features like the insights section and weekly reflections.

- **Lugh - AI Meeting Assistant**

Lugh is an AI-powered meeting assistant designed to help users gain more value from their meetings. It offers features like automated meeting attendance, transcription, analysis, and shareable meeting summaries. I contributed to the design and user experience by crafting intuitive interfaces for accessing meeting analytics, transcriptions, and team collaboration features.

- **Posify - AI Image Generator**

Posify is a creative social media content app that enables users to generate unique, AI-driven images and overcome creative blocks. With features like face swaps, customizable templates, and automated captions, Posify makes it easy to enhance social media engagement. This was my very first project, and I was thrilled to see it launch on the App Store. I led the app's design, focusing on user-friendly interfaces and visually engaging tools.

*Note: Posify is no longer available as we had to prioritize other projects.*

- **Tourvia - Capstone Project**

As a team member in Re:Coded's capstone project, I contributed to the creation of Tourvia—a collaborative effort by five UX/UI designers. The app, leveraging my international logistics background, offers customized journeys with seamless travel planning, emphasizing easy access to information and efficient spending management. This project showcases my teamwork, logistics, and user-centric digital solution skills.
